PROJECTS

PinTrips – A collaborative map-sharing app

MAY 2018 | <https://mypintrips.com>

- Used React and Google Firebase to create a web app where users can share map locations.
- As part of a team of 4, wrote the components that created a unique animated postcard based on location that a user could email, utilizing the EmailJS API and GreenSock animation library.
- Built functionality for adding new maps, registering service worker, and initializing Firestore offline caching.

HALP! - An app to help users by visualizing the pros & cons of a decision

APRIL 2018 | <https://github.com/cilavery/HALP>

- Utilized the Victory data charting React library. User can input pro and con points of a decision. The data is then presented graphically to help the user make a decision.
- Backend in Sequelize and Express, frontend in React and React-Redux .

AirPlay – E-commerce platform selling musical instruments

APRIL 2018 | <https://airplay1802.herokuapp.com>

- Worked on a team of 4 to create an e-commerce single-page application. Wrote the backend Sequelize schema for creating new products, routes for adding and listing all products and front-end React component for viewing all products.

EXPERIENCE

TweedWolf, New York - Photo Editor

FEBRUARY 2016 - NOVEMBER 2017
